

WHAT HAPPENS TO MY WASTE?

Once you send your waste to TerraCycle® it goes on a journey to become something new. These are the steps we take to give your waste a second life

1 The waste arrives at our warehouse where it is weighed, sorted and mixed with similar items

2 The plastics are sent to processing facilities where they are shredded, melted and turned into pellets

3 These pellets are then remolded into products like benches, picnic tables, and even playgrounds
